

Maths Parent Workshop Feedback October 2024

Our Maths Parent Workshop was held on Wednesday 9th October. The aim was to support parents with understanding how we teach the four operations (addition, subtraction, multiplication and division) across the school. Parents had the opportunity to visit different year groups and were shown how the four operations are taught. Two workshops were held in order to allow as many parents to attend. One workshop was held during school time and the other one took place after school (5:15-6:15). Parents were asked to complete an evaluation form. The feedback was extremely positive!

42 parents attended in total. We received **20** feedback forms.

100% strongly agree/agree that the maths workshop was useful

100% strongly agree/agree that they feel more confident with supporting their child with maths at home

100% strongly agree/agree that they have a better understanding of how maths is taught at Field Lane.

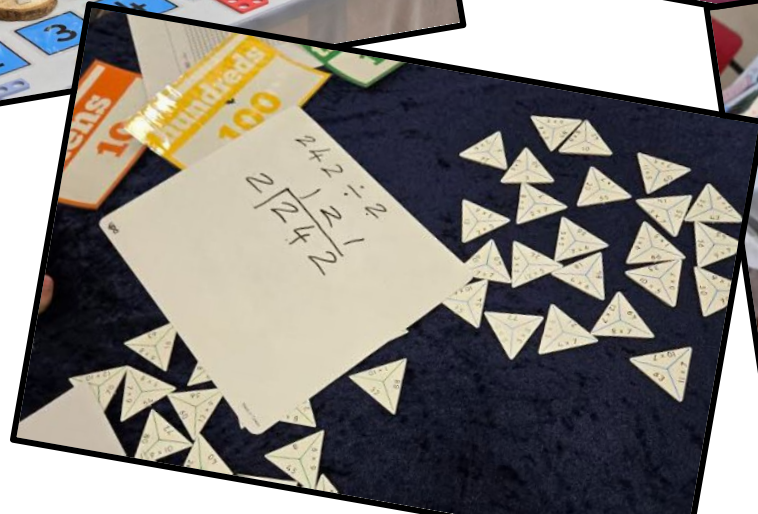

100% strongly agree/agree that the teachers were helpful

100% strongly agree/agree that they would like to attend another maths workshop

Maths Parent Workshop Comments October 2024

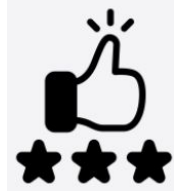

Definitely a game changer!

The teachers listened to my needs and provided support and reassurance

As always, it's an informative workshop where I walk away learning something new

The workshop was informative and engaging

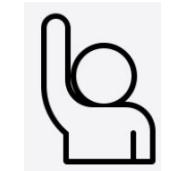

The teachers explained the methods clearly. I really appreciate that

Being able to visit the different year groups was really useful and helped me understand how maths is taught

Staff were approachable and informative

I was able to meet the different teachers and see how maths develops over the years
